

Seizing the Moment Right Now!

With rising gas prices, concerns about global warming, and continued traffic congestion which hurts our quality of life, now is the time to build the Red Line.

The Red Line will connect within our city, across our region, and to BRAC jobs and the District of Columbia (via MARC Train). This east-west transit line will link between Social Security Administration, Edmondson Village, University of Maryland at Baltimore, Harbor East, Fells Point, Canton, and the Johns Hopkins Bayview Medical Center. Large portions of the region will become more accessible such as BWI Airport, Hunt Valley, Owings Mills, and the Johns Hopkins Medical campus. Neighborhoods like Fells Point and Canton will be just one transfer away from Washington, DC.

Baltimore's Red Line

Connecting Baltimore and Beyond!

Baltimore Regional Rail System Plan

Baltimore Deserves a World-Class Transit System!

The Baltimore Red Line is the next step in building upon the Baltimore Regional Rail System, a world-class transit project that will be comprised of six lines, 109 miles, 122 stations and focus on giving riders greater access to jobs, education, shopping, recreation and medical care, and more.

Listening to the Neighborhoods!

Mayor Dixon's Red Line Community Compact ensures that communities along the Red Line are heard and treated fairly. Through the Compact, we will protect against construction impacts, honor our community resources, protect our environment and design great stations that fit in our neighborhoods.
